

AIRPAD AP 210

**Void-filling and product protection
with air**

The new and compact AIRPAD table top machine of Fromm follows the revolutionary idea of the successful AIRPAD machines AP502 and AP503:

- **Production of different pad sizes only at a touch of a button and not by changing film rolls.**
- **Pad sizes from 110 mm to 200 mm**
- **Lower costs by using folded flat films *without* pre-seals and pre-perforation.**
- **No compressed air / Versatile / Handy**

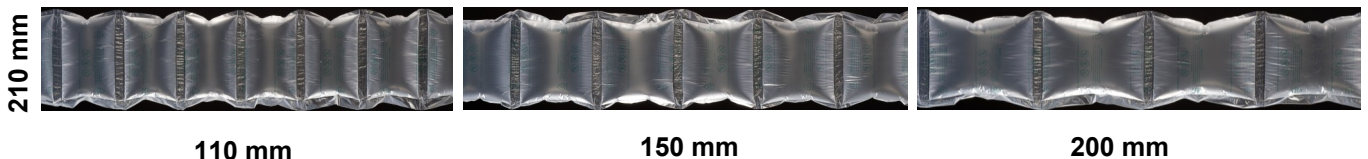

AIRPAD AP 210

The new table top machine in combination with a wide variety of standard or customised accessories offers customers an extensive range of applications:

Stand alone systems or integrated in multi-user workstations.

The large number of programs allow to produce the most suitable Airpads for your product. Endless production or preprogrammed amount of pads in different film-thicknesses and filmqualities open a wide field of applications.

Features of the machine:

- ◆ Long life design and rugged construction
- ◆ Minimum of maintenance required
- ◆ Easy teflon changes
- ◆ No compressor required
- ◆ Easy filmload
- ◆ Easy to operate
- ◆ Adjustable air volume
- ◆ Programmable lengths of air-chains
- ◆ Programmable lengths of airpads

Options:

- ◆ Movable and adjustable table
- ◆ Storage hoppers: - attached to table
- overhead
- ◆ Automatic Storage control
- ◆ Footswitch
- ◆ Remote control

Technical specifications:

- ◆ Power supply: 115 / 230V - 50 / 60Hz
- ◆ Pad sizes: From 110 - 200 mm programmable
- ◆ Film width: 210mm
- ◆ Film thickness: From 20my to 50my
- ◆ Film quality: PE and PE/PA
- ◆ **Folded film / no tube**

Easy to operate control panel
